## **DETAILED ACTION**

### ***Specification***

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

### ***Allowable Subject Matter***

Claims 10-18 are allowable.

The following is an examiner's statement of reasons for allowance: Claim 10 is allowed over the prior art of record. The prior art of record, considered individually or in combination, fails to fairly teach or suggest claim circuit comprising, among other limitations, a novel and unobvious limitation of "the multiplier is configured to establish a sequence of modulated emission frequency values according to values of the third sequence of digital values" structurally and functional interconnected with other limitation in the manner as cited in the claims and dependent claims 11-18.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2819
